Optimo 28-76	(*) (**)	(*) (**)	(**)	(*)
Optimo 17-80	(*)	(*)		(*)
Optimo 24-290	(*) (**)	(*) (**)	(**)	(*)
Optimo DP 16-42				(*)

(*) PL mount adaptation available from Angenieux partners

(**) Angenieux interchangeable mounts

Angenieux's Canon EF and Nikon F mount design.

Designed to replace the PL mount, Canon EF and Nikon F mounts allow the Optimo 15-40, Optimo 28-76 and Optimo 24-290 lenses to be used on DSLR cameras. This is an easy solution to mount an Optimo film lens onto a DSLR camera without the need of removing reflex mirror from the camera. Canon EF and Nikon F mounts replace the PL mount of the lens so that the lens can be attached to the camera with a very precise flange to image plane alignment. This precise fit lets the user take advantage of the entire optical capacity of the lens.

The majority of Angenieux Optimo lenses including the 17-80 Optimo and 16-42 Optimo DP are compatible with PL mount system designs for Canon, Nikon or Panasonic DSLR cameras (see chart).

DSLR cameras with Optimo zoom lens can be used :

- As Director's viewfinder.
- As a "B" camera.
- With repeatable and easy control of focus and zoom functions.
- With a lightweight and quick lens interchange.
