

Triolet™

CHIMERA's versatile Triolet can accept 3 lamp styles. With its unique new 2-pin screw-in adapter, the small, popular 650 watt 2-pin style lamps can be used (the protective glass dome assembly should be used with 2-pin lamps). The Triolet directly accepts Mogul base lamps and medium based bulbs via a screw-in adapter. The **CHIMERA** Triolet emits a broad, omni-directional light that is compatible with Lightbanks, Lanterns, Octabanks, or even without a modifier for a bare-bulb light effect. Both models come equipped with Quick Release Speed Rings that bayonet onto the housing.

#9930 – Lamp fixture, attached 15” power cord with in-line switch, and a #2930QR Quick Release Speed Ring.
Suggested List / \$299.00
