

## DLH1 x 150S Tungsten Soft Light

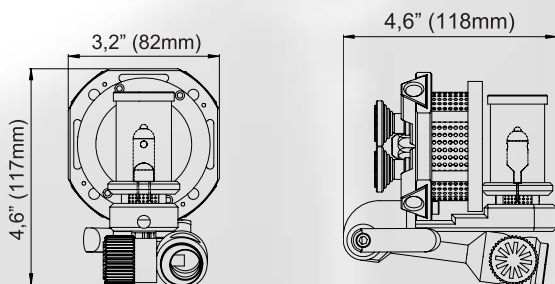

Don't let the small size and low wattage deceive you! Because of the high light output of the low voltage lamp, it performs well as an interview soft key or fill light. This soft light uses the same power supplies as the focusing DLH4 light head. When used with a 12 volt lamp it will also work with battery power. See power options on right.

Adjustable speed ring adapts to many soft boxes in seconds: Ø 90 mm for Dedoflex mini soft box (DSBSXS), Ø 130 mm for small (DSBSS) and for medium (DSBSM) size Dedoflex domes should a larger diffusion surface be desired.

For packing see page 37 ("soft light packing")

### Technical Data: DLH1x 150S

Weight: 600 g (1.3 lb.)  
 Max. wattage: 150 W  
 Mounting: To any 16 mm (5/8 ") stud
